Application Serial No.: 09/874,055 Reply to Office Action of November 25, 2003

## AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A coated material, characterized in that, having a surface is formed where a comprising a silane-based coating solution of a silane type comprising, as a main component, a compound represented by formula 1 is applied to a fiber material and hardened/solidified by the action of a catalyst

$$R_1O = \begin{bmatrix} R_4 \\ S_1 \\ OR_2 \end{bmatrix} R_3$$
 (1)

wherein R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub> and R<sub>4</sub> may be same or different and each is hydrogen or an alkyl group having 1-4 carbons and n = 2-10.

- 2. (Previously Presented) The coated material according to claim 1, wherein the surface is formed where, prior to the application of the coating solution, said fiber material is dipped in alcohol and dried and ultraviolet ray is further irradiated thereto.
- 3. (Previously Presented) The coated material according to claim 1, wherein the surface is formed where a hydrolyzable organic metal compound is used as a catalyst for hardening/solidifying said coating solution of a silane type.
- 4. (Previously Presented) The coated material according to claim 3, wherein the surface is formed where one or more organometallic compounds selected from the group consisting of titanium, zirconium, aluminum and tin is/are used as said hydrolyzable organometallic compound.
- 5. (Currently Amended) The coated material according to claim 1, wherein the surface is formed where, in addition to formula 1, a coating solution containing a compound represented by formula 2 having three hydrolyzable substituents and one unhydrolyzable substituent is used as the coating solution of a silane type

Reply to Office Action of November 25, 2003

$$R_5O \xrightarrow{R_8} | \\ C = Si \xrightarrow{OR_7} C$$

$$C = OR_7$$

$$C = OR_6$$

$$C = OR_7$$

wherein R<sub>5</sub>, R<sub>6</sub> and R<sub>7</sub> may be same or different and each is a monomer comprising hydrogen, an alkyl group or an alkenyl group; a bond of R<sub>5</sub>O, R<sub>6</sub>O and R<sub>7</sub>O to Si is an oligomer comprising a siloxane bond; and R<sub>8</sub> is an alkenyl group or a phenyl group which may contain an epoxy group or a glycidyl group in a molecule, and wherein the compound of formula 2 is added to the coating solution in an amount not exceeding 50% of the amount of formula 1 present in said coating solution.

6. (Currently Amended) The coated material according to claim 1, wherein the surface is formed where, in addition to formula 1, a coating solution containing a compound represented by formula 3 having two hydrolyzable substituents and two unhydrolyzable substituents is used as the coating solution of a silane type

wherein  $R_9$  and  $R_{11}$  may be same or different and each is a monomer comprising hydrogen, an alkyl group or an alkenyl group; a bond of  $R_9O$  and  $R_{11}O$  to Si is an oligomer comprising a siloxane bond; and  $R_{10}$  and  $R_{12}$  each is an alkyl group, an alkenyl group or a phenyl group which may contain an epoxy group or a glycidyl group in a molecule, and

Reply to Office Action of November 25, 2003

wherein the compound of formula 3 is added to the coating solution in an amount not exceeding 50% of the amount of formula 1 present in said coating solution.

7. (Currently Amended) The coated material according to claim 1, wherein the surface is formed where, in addition to formula 1, a coating solution containing a compound represented by formula 2 and a compound represented by formula 3 is used as the said coating solution of a silane type

$$\begin{array}{c}
R_{8} \\
R_{5}O \longrightarrow Si \longrightarrow OR_{7} \\
OR_{6}
\end{array}$$

$$\begin{array}{c}
R_{12} \\
R_{9}O \longrightarrow Si \longrightarrow OR_{11} \\
OR_{10}
\end{array}$$

$$\begin{array}{c}
R_{12} \\
CR_{10}
\end{array}$$

$$\begin{array}{c}

Reply to Office Action of November 25, 2003

wherein the compounds of formula 2 and formula 3 are added to the coating solution in an amount such that the total amount of formula 2 and formula 3 does not exceed 50% of the amount of formula 1 present in said coating solution.

8. (Currently Amended) A coating solution of a silane type for giving an appropriate strength and good light transmitting and water repelling properties to a fiber material where the said coating solution comprises a compound represented by above formula 1 and a catalyst for hardening/solidifying thereof. thereof

wherein  $R_1$ ,  $R_2$ ,  $R_3$  and  $R_4$  may be same or different and each is hydrogen or an alkyl group having 1-4 carbons and n = 2-10.

- 9. (Previously Presented) The coating solution according to claim 8, wherein the catalyst for hardening/solidifying the coating solution of a silane type is a hydrolyzable organometallic compound.
- 10. (Previously Presented) The coating solution according to claim 9, wherein the hydrolyzable organometallic compound is one or more organometallic compounds selected from the group consisting of titanium, zirconium, aluminum and tin.
- 11. (Currently Amended) The coating solution of claim 8, wherein the coating solution of a silane type contains a compound represented by formula 2 having three hydrolyzable substituents and one unhydrolyzable substituent in addition to the compound of formula 1

$$R_5O \xrightarrow{R_8} \begin{matrix} R_8 \\ \\ \\ \\ \\ OR_6 \end{matrix}$$
 (2)

wherein  $R_5$ ,  $R_6$  and  $R_7$  may be same or different and each is a monomer comprising hydrogen, an alkyl group or an alkenyl group; a bond of  $R_5O$ ,  $R_6O$  and  $R_7O$  to Si is an oligomer comprising a siloxane bond; and  $R_8$  is an alkenyl group or a phenyl group which may contain an epoxy group or a glycidyl group in a molecule, and wherein the compound of formula 2 is added to the coating solution in an amount not exceeding 50% of the amount of formula 1 present in said coating solution.

12. (Currently Amended) The coating solution of claim 8, wherein the coating solution of a silane type contains a compound represented by formula 3 having two hydrolyzable substituents and two unhydrolyzable substituents in addition to the compound of formula 1

(in the formula 3, wherein  $R_9$  and  $R_{11}$  may be same or different and each is a monomer comprising hydrogen, an alkyl group or an alkenyl group; a bond of  $R_9O$  and  $R_{11}O$  to Si is an oligomer comprising a siloxane bond; and  $R_{10}$  and  $R_{12}$  each is an alkyl group, an alkenyl group or a phenyl group which may contain an epoxy group or a glycidyl group in a molecule, and

Reply to Office Action of November 25, 2003

wherein the compound of formula 3 is added to the coating solution in an amount not exceeding 50% of the amount of formula 1 present in said coating solution.

13. (Currently Amended) The coating solution of claim 8, wherein the coating solution of a silane type contains a compound represented by formula 2 and a compound represented by formula 3 in addition to the compound of formula 1

wherein R<sub>5</sub>, R<sub>6</sub> and R<sub>7</sub> may be same or different and each is a monomer comprising hydrogen, an alkyl group or an alkenyl group; a bond of R<sub>5</sub>O, R<sub>6</sub>O and R<sub>7</sub>O to Si is an oligomer comprising a siloxane bond; and R<sub>8</sub> is an alkenyl group or a phenyl group which may contain an epoxy group or a glycidyl group in a molecule; and wherein R<sub>9</sub> and R<sub>11</sub> may be same or different and each is a monomer comprising hydrogen, an alkyl group or an alkenyl group; a bond of R<sub>9</sub>O and R<sub>11</sub>O to Si is an oligomer comprising a siloxane bond; and R<sub>10</sub> and R<sub>12</sub> each is an alkyl group, an alkenyl group or a phenyl group which may contain an epoxy group or a glycidyl group in a molecule, and

Application Serial No.: 09/874,055 Reply to Office Action of November 25, 2003

wherein the compounds of formula 2 and formula 3 are added to the coating solution in an amount such that the total amount of formula 2 and formula 3 does not exceed 50% of the amount of formula 1 present in said coating solution.

## SUPPORT FOR THE AMENDMENTS

Claims 1, 5-8, and 11-13 have been amended.

Claim 1 has been amended to improve the clarity of this claim. Support for the amendment of Claim 1 is provided by the corresponding claim as originally filed and page 12, line 3 to page 13, line 4. Claims 6, 7, 12, and 13 have been amended to correct the structure of formula 3. Support for this amendment is provided by the corresponding claims as originally filed. Claims 8 and 12 have been amended to remove a second period and a parenthetical phrase, respectively. Support for these amendments is provided by the corresponding claims as originally filed. Claims 5-7 and 11-13 have been amended to specify the relative amounts of formulae 1, 2, and 3. Support for this amendment of Claims 5-7 and 11-13 is provided by page 22, lines 15-19.

No new matter has been entered by the present amendment.
